

**THE EASTERN
TRANSPORTATION
COALITION**

CONNECTING FOR SOLUTIONS

The Eastern Transportation Coalition (formerly the I-95 Corridor Coalition) brings together over 200 transportation agencies from 17 states and the District of Columbia representing multiple jurisdictions, modes, disciplines, and programs along the Eastern states. Our partnership with State Departments of Transportation and related authorities and organizations began in 1993 with a focus on collaborating ideas to accelerate improvements in freight and passenger movement. In 2022, our vision and mission were updated, as follows, to reflect the broader geographic and programmatic range of the Coalition:

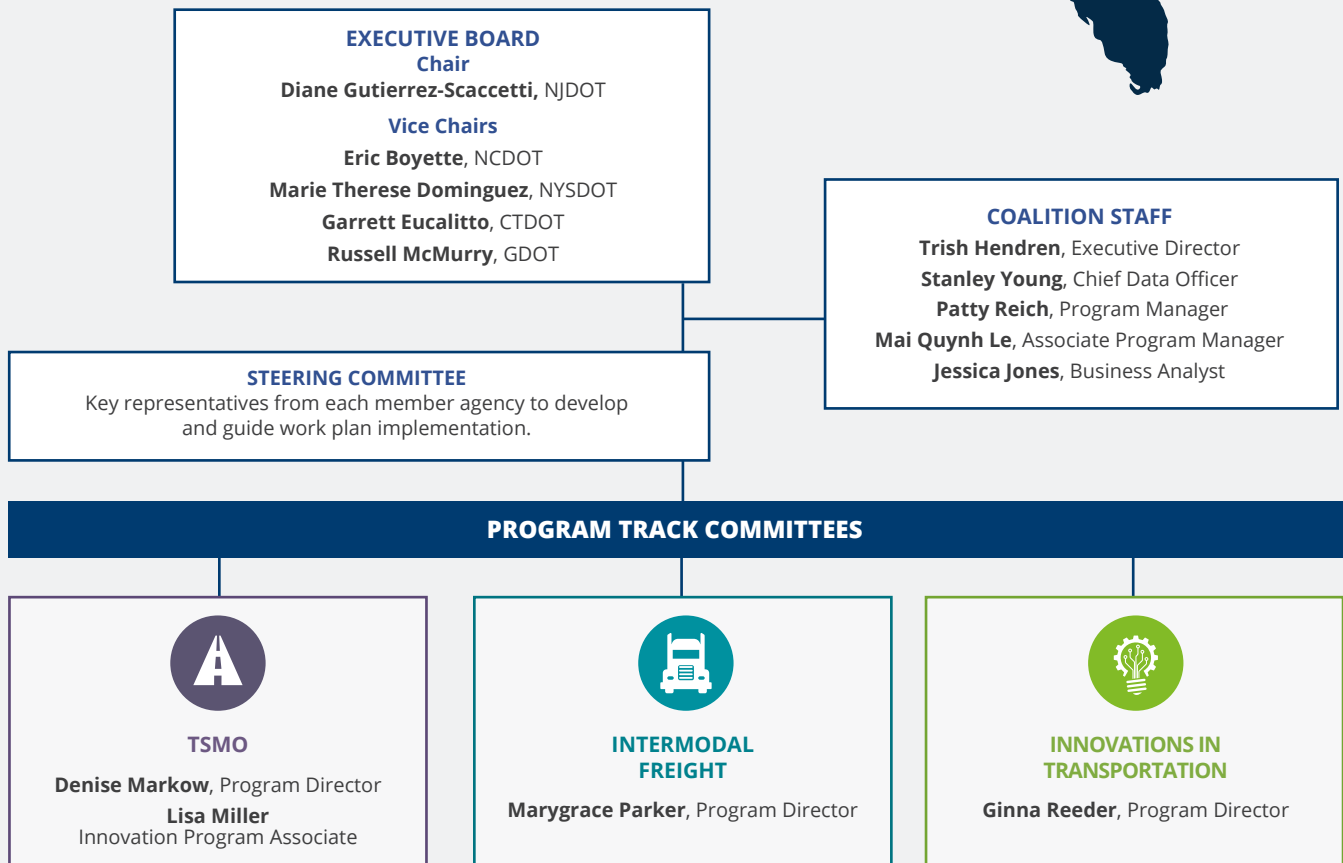

VISION: Advance The Future Of Transportation

We envision a reliable, smart, integrated, sustainable, and resilient multimodal transportation system that maximizes safety, mobility, equity, and the economic competitiveness of the Eastern states.

MISSION: Connect For Solutions

We develop innovative and implementable ideas, exchange best practices, test emerging technologies, and leverage data and tools to address operational, intermodal, and funding challenges. We accomplish this mission by bringing diverse agencies and perspectives together in a proactive, inclusive, and agile manner.

The Organizational Structure of the Coalition is shown below.

COALITION PROGRAM TRACKS

The Coalition is organized into three program tracks.

The Transportation Systems Management and Operations Program (TSMO) is the Coalition's largest and most established. The TSMO program focuses on incident management, traveler information, emergency operations, congestion management and the use of data tools to maximize the safety, mobility, and reliability of the transportation system. The program also provides a forum for members to prepare for deployment of connected and automated vehicle technologies.

The Freight Program focuses on improving the safety, mobility, and efficiency of freight and goods moving within the Eastern States. The program covers all modes of goods movement, including trucking, rail, water, and aviation. Nearly 40 percent of U.S. gross domestic product and more than 4 billion tons of freight valued at almost \$3 trillion each year travel through the Coalition states. The program is a resource for member states to engage together on freight-related activities, with emphasis on multi-state coordination.

Innovation is an expanding program that supports members as they address new and emerging approaches related to transportation technology, policies, and partnerships. The Innovation program explores opportunities to use technology to advance new approaches to sustainable transportation funding, such as regional approaches to tolling and mileage-based user fees.

One page overviews for Coalition Programs are available on the website: www.tetccoalition.org

THE MANY BENEFITS OF COALITION MEMBERSHIP

- Diverse partnership of public agencies
- Collaboration for data, tools, and resources
- New ideas, technologies, testing ground ("stuff you can use")
- Peer-to-peer network, data, tools to enable system to function when needed most
- Academies, workshops, exchanges help members get ready for the future ("safe place")
- Bring eastern voice and perspectives into national discussions
- Quick response to emerging issues
